

PEOPLE SYSTEMS FOR FOUNDERS

Before your startup hires HR, build these 5 systems

Built from four startup people functions

01

A hiring decision that can be explained

Define the role, decision owner, must-have evidence, salary band, and final approval before the first CV arrives.

02

Onboarding that does not depend on memory

Every new hire should know what success looks like in week one, month one, and day 90.

03

One place for attendance, leave, and payroll rules

If the answer changes by manager, it is not a rule. It is a negotiation.

04

A feedback rhythm

Do not wait for appraisal season. Managers need a simple way to notice good work and address problems early.

05

A record of workforce decisions

Why did we hire, promote, adjust salary, or let someone go? Write it down while the context is fresh.

HR starts when decisions stop living only in the founder's head.

Which system is missing in your startup?
