

PEOPLE SYSTEMS FOR FOUNDERS

AI cut our time-to-hire by 30%.

Here is where I did not let it decide.

Built from four startup people functions

USE AI FOR

The work that slows people down

Organize applications. Surface role evidence. Flag missing information. Structure the shortlist.

KEEP HUMAN

The judgment that changes a life

Context, motivation, potential, career gaps, and the final decision need an accountable person.

DO NOT

Turn a score into a verdict

A clean number can still hide weak criteria, missing context, or a biased starting point.

DO

Make the criteria visible

Decide what evidence matters before screening begins. Apply it consistently. Record why the decision was made.

THE TEST

Can you explain the rejection without blaming the tool?

If not, the process is not ready for automation.

Use AI to reduce waiting.

Keep judgment accountable.
